CHENNAMALLA. ANJU GUNAKAR

Consultant Automation Developer

Guna.Chennamalla@outlook.com | +91 9502554684

PROFESSIONAL SUMMARY:

With over 5+ years of experience in the IT industry, I specialize in Robotic Process Automation (RPA). Leveraging platforms such as UiPath, Automation Anywhere 360, and Power Automate (Cloud & Desktop), I have successfully automated and delivered numerous solutions across Healthcare, Finance, and ERP domains.

- Developed and demonstrated multiple automation solutions as **Proof of Concepts**, encompassing feasibility studies, development, testing, and deployment.
- Engaged in the development of Custom Action Packages and code optimization, migration for SAP upgrades using **Automation Anywhere 360.**
- Proficient in utilizing & customizing the **Robotic Enterprise Framework** in UiPath.
- Firsthand experience in automating Citrix, Desktop & Web-Based Applications, and Java applet-based applications such as Oracle E-Business Suite and **Intelligent Document Processing**.
- Skilled in end-to-end RPA solution development using **Microsoft Power Automate**, including the creation of **ALM pipelines** for deployment and the development of both Managed and Unmanaged solutions.
- Capable of performing basic queries and managing Oracle SQL and MySQL databases during development.
- Experienced in developing chatbots for RPA solutions using Oracle's **Digital Assistant** Platform and Microsoft's **CoPilot Studio** platform.

WORK EXPERIENCE:

Deloitte Consulting India Private Limited

DC Consultant   **May 2024 – Present**

Currently gearing up for a new project starting in May 2025, I will be working on implementing Blue Prism and Power Platform solutions for a leading **Healthcare Industry** client.

- Leading the design, implementation & code optimization of Blue Prism and Power Platform solutions.
- Collaborating with stakeholders to gather requirements and ensure alignment with business goals.
- Developing comprehensive automation solutions to improve operational efficiency.
- Providing training and support to team members on new automation tools and processes.

Previously I served as an RPA Developer Consultant for a **Healthcare Industry** client, where I was responsible for designing and automating pharmacy processes using UiPath Automation Cloud, leveraging modern design experience, Citrix automation, a customized RE framework, and computer vision-based UI automation. Additionally, I built several libraries and reusable components, which can be utilized across all other automations by the team.

- Collaborated with stakeholders to automate 340B eligibility and audits within its pharmacy department.
- Actively involved in requirement gathering and infrastructure recommendations for UiPath Automation Cloud.
- Designed and automated 340B audit and eligibility processes using UiPath Automation Cloud across a multi-bot architecture.
- Leveraged modern design experience, Citrix automation, and a customized Robotic Enterprise framework.
- Utilized AI computer vision-based UI automation to enhance accuracy and efficiency.
- Built libraries and reusable components for use across all team automations.
- Conducted System Integration Testing (SIT) and load testing, executing production runs for over 300 transactions with 98% accuracy.

- Created comprehensive documentation, including Process Design Documents (PDD), Technical Design Documents (TDD), and self-learning guides for the automation.
- Performed code optimizations to enhance bot performance and efficiency.
- Provided training and support to team members on the new automation processes and tools.

Previously served as an RPA Developer Consultant for a **Consumer Products & Retail Industry** client, where I was responsible for migrating the client's existing critical bots to SAP GUI 8 compatibility, ensuring they functioned flawlessly post-migration.

- Collaborated with stakeholders to upgrade their existing automations implemented on SAP GUI 7 to ensure compatibility with the latest SAP GUI 8.
- Migrated existing bots to SAP GUI 8 compatibility.
- Successfully implemented migration for two standard and three critical bots.
- Conducted comprehensive testing to ensure smooth functionality post-migration.
- Performed code optimizations to enhance bot performance and efficiency.
- Implemented a PowerShell cleanup script to perform tasks such as sending alerts for disk space thresholds and deleting files/folders on remote machines using an Excel config file.
- Provided training to a junior team member on Automation Anywhere 360.
- Conducted training sessions for all team members on Document Automation in Automation Anywhere 360.

WonderBotz India Private Limited

Consultant Automation Developer   May 2022 – May 2024

Served as a Technical Lead and Solution Architect for Power Automate Cloud and Desktop, I am responsible for creating Solution Design Documents (SDD), designing solutions, setting up environments, deploying via pipelines, developing both attended and unattended Robotic Process Automations, and delivering comprehensive end-to-end solutions.

- Collaborated with clients in the Healthcare, Banking, and Renewable Energy sectors for implementing automation solutions utilizing Power Apps, Power Automate Cloud, and Power Automate Desktop.
- Actively involved in requirement gathering and providing infrastructure and license recommendations to clients for Power Automate Desktop.
- Designed and developed two notable frameworks, ReportBotz and InvoiceBotz, for WonderBotz using Automation Anywhere 360.
- Created and developed multiple Custom Action Packages for Automation Anywhere 360.
- Partnered with sales leads and Subject Matter Experts (SMEs) to demonstrate Proof of Concepts for Power Apps and Power Virtual Agents.
- Engaged in training colleagues on both Power Automate and Automation Anywhere 360.

Sunera Technologies Private Limited

I worked on multiple use cases ranging from desktop, web based to e-business suite and backend automations with databases and tried to grasp as much knowledge as I could and tried to get complete firsthand experience with UiPath.

Senior Software Engineer   Jul 2021 – Apr 2022

- Automated Invoice Processing in Oracle e-business suite using UiPath.
- Designed UiPath workflows using Robotic Enterprise Framework (RE-framework).
- Utilized UiPath for document understanding, PDF automation, email automation, data tables, and data validation activities.
- Managed both Attended and Unattended Robot resources, providing centralized Robot logs, remote execution, monitoring, scheduling, and work queues using UiPath Orchestrator.
- Designed Invoice Approval sequences using Power Automate.
- Executed various SQL queries and join statements.
- Implemented exception handling and debugging for robust and efficient automations.

- Created Solution Design Documents (SDD) and user manuals.
- Worked across Windows, Office Applications, browsers, Java Applications, and different databases.

Software Engineer   **Apr 2020 – Jun 2021**

- Designed a Digital Assistant for P2P and O2C cycles using UiPath Rest API Services and Oracle Digital Assistant Platform.
- Integrated the Digital Assistant with environments such as Slack, Microsoft Teams, websites, and Android applications using SDK.
- Built conversational bots using Google's Dialog Flow and Microsoft's Power Virtual Agent.
- Developed RPA solutions using UiPath state machine workflows.

Trainee Engineer   **Dec 2019 – Mar 2020**

- Researched various RPA tools and selected UiPath for solution development.
- Gained firsthand experience with UiPath and its features.
- Trained on Oracle e-business suite and explored finance modules (AP, AR, GL) to design proof of concept (POC) for one of the flows.
- Identified Order to Cash Cycle and Procure-to-Pay Cycle as use cases for implementing RPA.

ACHIEVEMENTS And RECOGNITIONS:

- **Nominated for Outstanding Performer Award**: Recognized in my first year at **Deloitte Consulting India Private Limited** for exceptional performance.
- **Proficiency Cultivator Award**: Received from **WonderBotz India Private Limited** in February 2024 for demonstrating high proficiency in my role.
- **Star Performer of the Year 2021**: Honored by **Sunera Technologies Private Limited** at the annual summit.
- **Promotion to Senior Software Engineer**: Promoted directly from Trainee Engineer after a one-year probation period at Sunera Technologies Private Limited.

SKILLS:

RPA Tools	:	UiPath, Microsoft Power Automate, Automation Anywhere 360
Co-Pilots / Digital Assistants	:	Oracle Digital Assistant (ODA), Microsoft Copilot
Programming Languages	:	Python (Basics)
Databases	:	MySQL, Microsoft SQL

CERTIFICATIONS:

- **UiPath Certified Professional Automation Professional** from UiPath.
- **Power Platform Fundamentals (PL – 900)** from Microsoft.
- **Automation Anywhere Master Certified Professional** from Automation Anywhere.
- **Automation Anywhere Advanced Certified Professional** from Automation Anywhere.

EDUCATION:

- Bachelor of Technology | Electrical and Electronics Engineering | 2015-2019 | Lendi Institute of Engineering and Technology | 70%
- Intermediate | Math Physics and Chemistry | 2013-2015 | Sri Basara Junior College | 82%
- S.S.C | 2012-2013 | Catherine Public School Bheemili | 8.3 GPA
